Introducing New Bekaert ZA High Strength Barbed Wire

Quality and value can now be found in a new product from Bekaert.

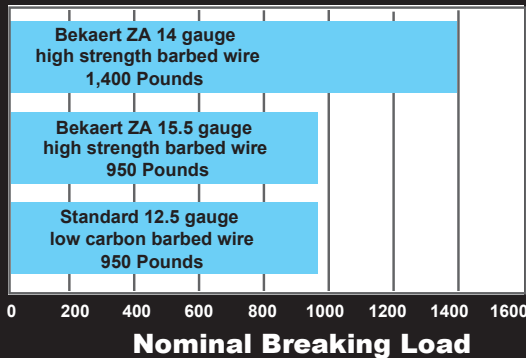

Bekaert ZA barbed wire utilizes an advanced Zinc-Aluminum (ZA) coating to maximize fence life as well as value.

Salt spray testing performed according to ASTM B 117 has demonstrated corrosion resistance two to three times greater than Class 1 galvanization.

Bekaert ZA meets or exceeds ASTM A 856 Coating Class 20 specification and is manufactured to the ASTM A 121 barbed wire standard.

Barbed Wire Strength

Bekaert ZA is made from the same high tensile steel as our industry leading Gaucho[®], Motto[®], and Cattleman[®] high tensile barbed wire. Bekaert ZA like all other Bekaert high tensile barbed wire has equal or greater strength than standard 12.5g barbed wire.

High tensile wire is easier to install because of its lighter weight and requires fewer posts during installation than low carbon fencing. Once properly installed, high tensile fences remain tight for years and require very little maintenance.

Part Number	Fence Design	Barb Spacing	Barb Diameter	Line Wire Diameter	Reel Length	Reel Weight	Finish
145808	2-Point	5"	13.75g	15.5g	1320'	41 lbs	ZA
145809	4-Point	5"	16.5g	15.5g	1320'	42 lbs	ZA
145988	4-Point	3"	16.5g	15.5g	1320'	51 lbs	ZA
145733	2-Point	5"	14g	14g	1320'	56 lbs	ZA
145734	4-Point	5"	14g	14g	1320'	64 lbs	ZA

Bekaert ZA is the ultimate solution for high quality and long life at an affordable price!
